# CURTA

the unique high precision calculator

In this age of automation, the CURTA, with its ultra-modern design equips the individual with a personal calculating mechanism, which combines more advantages than any single other calculating machine:

### For office work

On the desk or counter the CURTA is always ready for use, taking up no valuable space — a time and effort saving companion for every calculation.

### For field work

Surveyors, engineers, executives and professional men, whether for field or home work or on their travels, will find that the CURTA is the only complete calculating machine that comfortably fits in a brief case or coat pocket.

### For design and research work

Always to hand, like a slide rule, the CURTA will make light work of all calculations performed by the heavy and more cumbersome desk-type calculators.

**Capacity:** CURTA Model I: 8 x 6 x 11 digits, (weight 8 ozs).  
CURTA Model II: 11 x 8 x 15 digits, (weight 12 ozs).

Sturdy, rustfree and tropicalized all metal construction. Attractively finished dust- and shockproof metal container.
