

LETTER 8

Nov 29th 1903
Queensland

Messrs Pulsometer Engineering Co, Ltd.
Reading, England.

Dear Sirs,

I beg to acknowledge yours of Oct, 20th with receipt enclosed and also note Discounts allowed. I have no doubt the goods will follow in due course by next Steamer.

I notice the illustration of the "Raplin" Hand ice machine which I have shown to numerous clients, and feel sure these machines would be suitable for this climate where Ice is wanted all year round, and where the large number of Hotels and Hospitals are at too great a distance from a City to obtain it.

You may possibly have enclosed particulars in case with Pump if not kindly send by return Prices, method of working, of your different ice machines.

I am yours faithfully
Alf Geo Jackson
