

LETTER 25

JUNE 19TH 1904

HON ARCHDEACON TROTTER  
CHARLEVILLE

Sir,

Mr Simpson asked me to quote you for small "Acetylene Generator", I regret not being able to show you the working of my type of Generators when you called on me.

I enclose you copy of instructions and should recommend the small size which we use for Magic Lanterns you see listed at 20/-, this will run up to 3 or 4 lights, I can supply a rubber tube and nickel plated bracket at an extra cost of 10/- charging 25/- for Generator making 35/- for the whole outfit, which allows 5/- off for the carriage you will have to pay. These generators are used by many doctors for inside use, Salvation Army, Christian Endeavours, Photographic and Royal Society and others, the cells on order can be forwarded with generator if you decide to adopt

Yours  
*Alf Geo Jackson*
