

LETTER 43

18th Sept 1904

E.D.5
Messrs Pulsometer Engineering Coy
Reading, ENGLAND.

Dear Sirs,

I beg to acknowledge yours of Aug 4th 1904, and also copies of Ice Making Machinery circular, which I am now placing before likely clients.

I notice your commission is only 5% which does not allow much expense in pushing, this can be adjusted in the future if there is any demand for such apparatus.

I should have been glad to receive some copies of the circulars of the small machines, as there may be a greater sale of these than the larger machines where the population is small and scattered.

Yours faithfully,
Alf Geo Jackson
