

LETTER 50

Oct 15th 1904

Messrs Veritys Ltd,
31 King St,
Covent Garden,
LONDON W.C.

Dear Sirs,

Yours of 30th August to hand. We were in doubt ourselves whether you would read our cable to mean two gross of each, or two gross altogether, and did not much signify as the cells are in constant demand.

I am in anticipation of their early arrival as we are run out and do not wish to buy locally.

I have just given prices from your list for 3 & 10 H.P. Motors for passenger lifts in a new building here, which have to be fitted within 7 months and would like any special lists of switches, or gear, you may have suitable for these.

I am pleased to inform you that shortly I shall be moving into new and larger premises in Ann Street, Brisbane, amalgamating with the Synchronome Coy of Australasia, and would like to know if you have any objection to our advertising as agent for your goods.

We have opened agencies both in Sydney and Melbourne, to push the Synchronome Time Service and you might consider whether it might be to our mutual benefit to take up your sole agency for these states.

Our Mr Knox leaves here for London possibly this month, and he will call upon you relative to this, and explain matters.

I look forward to the arrival of your new catalogue and anticipate sending an order soon.

I am yours faithfully,
Alf Geo Jackson
