

LETTER 78

May 2<sup>nd</sup>. 1908

Messrs. Veritys Ltd.  
King Street,  
London W.C.

Dear Sirs,

Your's of March 13<sup>th</sup> to hand which I acknowledge with pleasure and appreciate your kind offer to give my Son Apprenticeship in your works. I have no doubt he will have called on you ere this, but in case of his not having been able to do so, his address would be C/- William Jackson, Ashley Rd, Altrincham, Manchester,

As regards his work of course I wish him to obtain the knowledge and practice most suitable to assist me in carrying on and developing the Electrical Business out here, whether he will eventually care to do so remains to be seen, but so far he seems to take to it and has been fond of study as his numerous certificates show, and his having passed the Sydney University Junior examination before leaving here. Of course as to his personal expenses his Grandfather will look after that for me over there. I'm inclined to think that if he could go through your works, especially the testing, draughting, and estimating departments it would be as it were information put to your Credit because it could not help but bear fruit in the near future. Again thanking you, and hoping this will bring us in nearer touch for much future business.

I am,

Yours faithfully,  
*Alf Geo Jackson*
