

LETTER 97

February 16th 1910

James Hurll Esq.,
20 Loftus Street,
Sydney.

Dear Sir,

I herewith enclose a rough draft of specification for Patent for "Thermostat" Fire Detector. This is not exactly as I sent it in here, but would be a guide for you abroad as they have different wording. Hope to hear from you whether anything is likely to be fixed up as I have a few here who are asking me to let them take it up and I wish to get something definite done.

I expect to go to N.Z. first week next month and will call when in Sydney. We are so busy here since my return that I cannot obtain men to do our work.

Wishing you a pleasant trip.

I am,

Yours faithfully,
Alf Geo Jackson
